# Legal Disclaimer

Mosta · Last updated 2026-11-11

The financial services on the Mosta platform are provided by the licensed companies. The licensed companies are the companies identified on the Licensing page at https://legal.mosta.io/v4/licensing. "Mosta" is the trade name of the website and platform at https://mosta.io, under which the licensed companies provide their services.

Funds and digital assets associated with your use of the Platform are held by the licensed companies or, where the licensed companies engage third-party custodians, banks, or other financial institutions, by those institutions to hold, safeguard, or settle such funds or assets on behalf of the licensed companies. Account balances are ledger entries recorded in the systems of the licensed companies, are not deposits, and are not insured or guaranteed by the Canada Deposit Insurance Corporation (CDIC), the U.S. Federal Deposit Insurance Corporation (FDIC), or any other deposit-insurance or investor-compensation scheme. The licensed companies are under no obligation to proactively disclose the identity of any third-party custodian or financial institution they engage, except where required by applicable law, though customers may inquire about the status or holding of their assets at any time.

The licensed companies make no representations or warranties, express or implied, regarding the security, performance, or solvency of any third-party custodian or financial institution they engage. Under no circumstances shall the licensed companies, or their officers, directors, employees, or affiliates, be liable for any direct, indirect, incidental, consequential, or punitive damages arising from the use of the services or from any actions or omissions of such third parties, except to the extent such liability cannot be excluded under applicable law.

By accessing or using the services, you acknowledge that you have read, understood, and agree to this disclaimer in its entirety. If you do not agree with the terms set forth above, please do not use the services.
